<p>Topic – research problem – for which the candidate supervisor seeks a doctoral student</p>	<ol style="list-style-type: none"> 1. The study evaluates food safety knowledge among workers and patrons in the food and beverage sector, identifying knowledge gaps in risk prevention, hygiene, and safe food handling procedures in developed and developing countries, examines cultural, educational, and socio-economic factors influencing awareness, and assesses knowledge disparities between employees and tourists. 2. The study evaluates food safety training programs for food service employees, assesses their effectiveness in promoting safe practices, and proposes recommendations for improvement. This study aims to improve food safety practices through evidence-based recommendations, targeted interventions, public awareness campaigns, mandatory training, and certification programs. 3. The study evaluates food purchasing choices by young people referring to the sustainable approach
